

WEATHER FORECAST

LITTLE VALLEY / CATTARAUGUS COUNTY, NY — JEREMY FULLER, METEOROLOGIST — MAY 9, 2017

TUES	WED	THURS	FRI	SAT	SUN	MON
 MAY 9 55	 MAY 10 30 / 60	 MAY 11 35 / 62	 MAY 12 42 / 60	 MAY 13 42 / 58	 MAY 14 42 / 60	 MAY 15 42 / 62
 MAY 16 42 / 65	 MAY 17 58 / 70	 MAY 18 50 / 65	 MAY 19 38 / 65	 MAY 20 32 / 68	 MAY 21 40 / 68	 MAY 22 50 / 75

FORECAST DISCUSSION:

Conditions this week should, for the most part, be more bearable than last week. Temperatures will be slightly below average, but not by much, with high temperatures around 60 degrees (average is mid-60s). In terms of rain, there *might* be a few light rain showers Thursday, but the main threat of rain is going to be on Mother's Day. Whether the whole weekend will be a rainout depends on the track of a low-pressure system on the East Coast. The models seem to be in general agreement that this system will miss us to the south and east. We'll still get rain on Sunday, but if the model forecast holds, Saturday should be cloudy, but mostly dry.

Frost note: there is a risk of some light frost Wednesday morning, May 10, but it should not cause significant damage; this will not be a hard freeze.

Next week, the models generally agree, will be noticeably warmer, and mostly dry, with the exception of some thunderstorms possible around May 18.

NORMALS & ALMANAC FOR MAY 1-10:

High temperature: 64...67 — Low temperature: 38...41

Sunrise: 6:00...5:51am — Sunset: 8:24...8:33pm

Daylight: 14hr:24min...14hr:42min (+2.0 min/day)
