## Forecast Discussion:

In light of the proverbial fog in my head this morning, I'll keep this forecast short, sweet, and simple:

- It's going to rain for most of the weekend.
- It will be mostly cloudy and warm but not particularly hot for most of the work week. There is some rain, not a lot but some, in the forecast for Wednesday.
- Skies will clear for the most part from Thursday through Saturday. It will be noticeably warmer come Saturday with some clouds starting to build in.
- The Sunday before Memorial Day looks to be quite rainy, and given the temperatures, I would venture to guess thunderstorms are possible.
- The longest-range models are suggesting a prolonged stretch of dry weather from Memorial Day onward. The models have suggested near-average temperatures (around 70 for this time of year); historical analogs, although there aren't a lot of consistent choices, do favor warmer-than-average conditions.

## Normals and Almanac: May 18-27

High temperature: 67...69 — Low temperature: 41...44

Sunrise: 5:51—5:44<sup>a.m.</sup> — Sunset: 8:33—8:41<sup>p.m.</sup> — Daylight: 14<sup>hr</sup>:42<sup>min</sup>— 14<sup>hr</sup>:57<sup>min</sup> (+1.7<sup>min</sup>/<sub>day</sub>)
